Teams are responsible for acquiring canned food.

It starts with **one can**, to change the world and to lift the spirit of a person in need.

To participate, all that is needed is a team of caring people under the direction of an architect or an engineer to design and build a structure made from canned food.

At the end of the event the food will be donated to The Volunteer Way Food Bank.

Think, Do you have what it takes to design and build a structure made of nothing more than canned food, ingenuity, and luck?

Enter today. Get creative and help stop hunger.
